Web Development	HTML, CSS, JavaScript, React.js, Next.js, Node.js, Express.js, Laravel, Material UI
Programming Languages	C, C++, Python
Database	MySQL, MongoDB

EXPERIENCE

Vertex Technosys

Junior Fullstack Developer   **July 2023 — Present**

- Proficiently managed projects involving ReactJS, Redux, Next.js.
- Contributed to the development of the Function Hall project by utilizing React.js for frontend and Laravel for backend.
- Took charge of the admin panel development for the Hotel booking project, ensuring smooth user experience.
- Contributed to the development of the Hotel Booking project by utilizing Next.js, Redux, Material UI.
- Developed a shopping website with advanced features including search based on various factors, login authentication with JWT Token system, adding items to the cart, and order processing.
- Utilized Redux for efficient state management, resulting in significant enhancements to application performance and decreased load times.
- Handled data fetching from external APIs using requests or libraries like Axios, ensuring smooth communication between frontend and backend systems.
- Employed advanced techniques such as lazy loading and caching to optimize frontend performance, leading to faster loading times and improved overall user experience.
- Collaborated effectively with the team to deliver successful outcomes.

Frontend Development Intern   **January 2023 — June 2023**

- Completed internship focusing on technologies such as JavaScript, HTML5, CSS3, Bootstrap, React.
- Coding, updating, and debugging frontend components.
- Planning and executing projects with precision.
- Applied acquired skills to real-world projects, gaining hands-on experience in web development.

PROJECT

TrendSays
Website | TrendSays

- Developed TrendSays, a dynamic blog website showcasing trending topics in technology, lifestyle, science, entertainment, space, and education.
- Technology Used: React, Node.js, Express and MongoDB

Shopping Website
Website | E-commerce

- Developed a comprehensive e-commerce platform specializing in clothing for men and women.
- Implemented an advanced search function based on a variety of features, ensuring that users identify the desired features correctly.
- JWT token-based access authentication is included for improved security. It allowed for easy shopping, including supplies to add to the cart and orders.
- It was built with React for the front end and Node.js, Express, MongoDB for the back end.

CERTIFICATES

- Software Development Fundamentals   Microsoft Technology Associate
- C++ For C Programmers   COURSERA (University of California, Santa Cruz)
- Web Design for Everybody   COURSERA (University of Michigan)
- Programming for Everybody   COURSERA (University of Michigan)
